

Tamper-Resistant Receptacles

MEETS 2008
NATIONAL
ELECTRICAL CODE®
REQUIREMENTS

THE MOST COMPLETE LINE TO PROTECT YOUNG CHILDREN.

Pass & Seymour

■ THE ONE THAT WORKS FOR YOU®

P&S Tamper-Resistant Receptacles — the full line to meet the 2008 NEC® and enhance child safety.

Little kids experiment and explore — and sometimes electrical receptacles draw their attention. Nobody can watch a child every second. But P&S Tamper-Resistant Receptacles protect children by letting plugs in, but keeping keys and other objects out with automatic shutters that block access. This proven safety solution provides a simple way to prevent painful injuries

CHOICES.**

that are traumatic for children and parents alike. It's far safer and more convenient than plastic outlet caps — which young kids can easily remove.

Because tamper-resistant receptacles provide a real solution to a real problem, they're required in new residential construction by the 2008 National Electrical Code®. You'll find everything you're looking for in the broad P&S Tamper-Resistant Receptacle line. Protection and traditional style in our 3232 TradeMaster® Duplex Receptacle. Unique models like the P&S Nightlight/GFCI Combination. Fresh style in our P&S Signature™ choices. And much more!

For all their added safety, P&S Tamper-Resistant Receptacles provide the same fast, easy installation as our standard receptacles.

*GFCI shown with optional screwless wall plate.

Patented internal shutter system — lets plugs in, but keeps keys and other objects out with automatic shutters that block access.

Proven safety — our residential Tamper-Resistant Receptacles offer the same protection as our Hospital-Grade Tamper-Resistant Receptacles, used for years in healthcare-facility pediatric wards, where they're required by the National Electrical Code.®

Models for every home location and purpose — whatever you're looking for, you'll find it in the complete P&S Tamper-Resistant line with the same features and easy installation that you've come to expect from Pass & Seymour.

Sealed LED nightlight adds safety — For added convenience, this redesigned P&S Nightlight/GFCI Combination provides a duplex receptacle instead of the single receptacle in the previous version.

*GFCI shown with optional screwless wall plate.

WHY THEY'RE NEEDED.

More than 24,000 children in the U.S. under the age of 10 were treated in emergency rooms for injuries related to electrical receptacles — approximately 7 children per day.* In most of these cases:

- The victims were younger than 4 years old and suffered first- or second-degree burns.
- Children were injured when sticking common objects such as hairpins or keys into receptacles.
- The injuries occurred at home.

Required for years in healthcare facilities' pediatric-care areas, P&S Tamper-Resistant Receptacles are easily affordable for homeowners. The National Electrical Manufacturers Association (NEMA) estimated an incremental cost for installing tamper-resistant receptacles throughout a typical new home at less than the average cost of a single child safety car seat!

*Based on a National Electrical Manufacturers Association analysis of U.S. Consumer Product Safety Commission data.
