**Speaker Selectors • Volume Controls**

## Is There Such A Thing As Too Much Control?

### SS8P 8-Pair Speaker Selector

# Speaker Selectors

Why are they special? Consider that they give you the ability to choose which speakers you want to play. The result: enjoyment of your music in your home.

Proficient Speaker Selectors are also a great choice for running a secondary system at your house, and are the perfect complement to Proficient High-Current stereo amplifiers.

# SS

## Proficient Volume Controls and Speaker Selectors

It has often been said correctly that "life is in the details". Rarely is this fact more evident than when it comes to controlling your Whole House Audio system. Take your volume controls and speaker selectors, for example. They're two of the most essential and often most overlooked details and, as such, are worthy of your closest investigation. Now, before you say: "are you kidding?", we'd like to dial you in on why Proficient is the best choice around for these two important components.

### SS4P 4-Pair Speaker Selector

## VC60i Impedance Balancing Volume Control

The VC60i is a 60 watt impedance balancing volume control which connects between a pair of speakers and the speaker output of an amplifier, receiver or speaker selector.

## VC45i Impedance Balancing Volume Control

The VC45i is a 45 watt impedance balancing volume control which connects between a pair of speakers and the speaker output of an amplifier, receiver or speaker selector.

# Volume Controls

If you tend to think of volume control as, well, volume controls – we'd like to present you with the two best reasons to choose Proficient: More Volume and Less Noise. Plus, just as we do with our speaker and electronics products, all our Volume Controls are extensively tested.

That way, we make sure they'll deliver years of reliable performance with minimum distortion. You'll not only love the way they feel, but they'll change your belief about what a great difference the right volume control can make to the enjoyment of your system.

## VC60SIR Slider Stereo Volume Control with Built-In IR Receiver

The Proficient VC60SIR is a 60 watt inwall slider stereo volume control with integrated IR Receiver. It connects between the speaker level output of an amplifier, receiver or speaker selector and a pair of speakers.

## VC60SL Slider Stereo Volume Control

The Proficient VC60SL is a 60 watt inwall slider stereo volume control. It connects between the speaker level output of an amplifier, receiver or speaker selector and a pair of speakers.

## VCS60 Volume Control

The VCS60 is a 60 watt inwall stereo volume control which connects between a pair of speakers and the speaker level output of an amplifier, receiver or speaker selector.

## VC60AW Outdoor Volume Control

The VC60AW is a 60 watt weather-resistant, stereo volume control which connects between the speaker output of an amplifier, receiver or speaker selector and a pair of speakers.

# Volume Controls

And, if all that's still not quite enough, consider this: each Proficient Volume Control comes with a 10 Year Warranty.

Proficient builds some of the industry's best products and backs it with a "no questions asked" warranty to prove it.

## VC60i Impedance Balancing Volume Control

Impedance balancing  
Power Rating: 60 watts continuous; 120 watts peak music power  
Steps: 12 (make before break)  
Frequency Response: 20Hz - 20kHz  
Total Attenuation: 42dB maximum  
Mounting: Fits most single-gang junction boxes and plaster rings  
Includes white, bone & almond plates, inserts & knobs

## VC45i Impedance Balancing Volume Control

Impedance balancing  
Power Rating: 45 watts continuous; 90 watts peak music power  
Steps: 10 (make before break)  
Frequency Response: 20Hz - 20kHz  
Total Attenuation: 42dB maximum  
Mounting: Fits most single-gang junction boxes and plaster rings  
Includes white, bone & almond plates, inserts & knobs

## VC60SIR wht/bone/alm Slider Volume Control w/ Built-In IR Receiver

Stereo slider volume control with integrated IR receiver  
Power Rating: 60 watts continuous; 120 watts peak music power  
Steps: 12 (make before break)  
Frequency Response: 20Hz - 20kHz  
Total Attenuation: 42dB maximum  
Mounting: Fits most single-gang junction boxes and plaster rings  
Available in white, bone & almond

## VC60SL Slider Stereo Volume Control

Stereo slider volume control  
Power Rating: 60 watts continuous; 120 watts peak music power  
Steps: 12 (make before break)  
Frequency Response: 20Hz - 20kHz  
Total Attenuation: 42dB maximum  
Mounting: Fits most single-gang junction boxes and plaster rings  
Includes white, bone & almond sliders & plates

## VCS60 Stereo Volume Control

Stereo Volume Control  
Power Rating: 60 watts continuous; 120 watts peak music power  
Steps: 12 (make or break)  
Frequency response: 20Hz - 20kHz  
Total Attenuation: 42dB maximum  
Mounting: Fits nearly all single-gang junction boxes and plaster rings  
Includes white, bone & almond plates, inserts & knobs

## VC60AW Weather Resistant Stereo Volume Control

Stereo weather-resistant volume control  
Power Rating: 60 watts continuous; 120 watts peak music power  
Steps: 12 (make or break)  
Frequency Response: 20Hz - 20kHz  
Total Attenuation: 42dB maximum  
Mounting: Fits onto 3/4" conduit or can be surface mounted  
Color: Gray

## SS8P 8-Pair Speaker Selector

High Power Handling: 125 watts per channel continuous  
Dual protection circuitry insures safe operation, eight speaker pair on/off switches  
Includes 100 area labels  
Frequency Response: 20Hz - 20kHz  
Dimensions (H x W x D): 2 3/16" x 17" x 6 1/2"

## SS4P 4-Pair Speaker Selector

High Power Handling: 125 watts per channel continuous  
Dual protection circuitry insures safe operation, four speaker pair on/off switches  
Includes 100 area labels  
Frequency Response: 20Hz - 20kHz  
Dimensions (H x W x D): 2 3/16" x 8 3/4" x 6 1/2"
